Trim Size with hem allowance. Nothing will print beyond this point.

Safe Guide. Keep important text and graphics inside this guide.
(Note: Elements you want to bleed should extend to the trim size edge. Anything you don't want turned to the back or stitched thru should remain inside the safe guide area.)

CONVERT TYPE to OUTLINES

All type elements should be converted to outlines using the Create Outlines function in the type menu.

PHOTOSHOP/ PHOTOS

Should be at least 85 ppi (dpi) at the size they will appear when enlarged to final print size.
